

VACANCIES:

POOL OF SESSIONAL OUTREACH WORKERS

Working in partnership with Ipswich and East Suffolk Clinical Commissioning Group (CCG), BSC plans to organise a series of health and wellbeing events to raise awareness of health and related issues within the Black Minority Ethnic communities in Ipswich and East Suffolk.

BSC is keen to recruit a pool of sessional outreach workers to promote its health and wellbeing events and activities as widely as possible and recruit people from diverse background to attend the events. This will enable more people to understand the importance of leading a healthy and active lifestyle, and improve their knowledge of local health services.

If you have proven interpersonal and communication skills (including fluency in at least one ethnic language Polish, Romanian, Portuguese and other eastern European languages, Mandarin/Cantonese, Arabic, Kurdish / Sorani, Pashtu, etc.) and want to make a real difference to the lives of people in your communities, BSC would like to hear from you.

ABOUT BSC

Bangladeshi Support Centre (BSC) is an award-winning community organisation with an excellent track-record of planning and delivering community projects, small and large. For 20 years now, BSC has been playing a significant role in improving the quality of life of local BME people. In recognition of its achievements, BSC has won local, regional and national recognition including 'Best Community Organisation' in the UK award; invitation to The Queen's Diamond Jubilee Celebration (2012), and recently an award from the High Sheriff of Suffolk and visit by HRH Prince Edwards.

ABOUT BME HEALTH AWARENESS AND PREVENTION PROJECT

With Black and Minority Ethnic (BME) people now making up 20% of the population in Ipswich and surrounding areas, this proposal seeks to engage BME people: 1) To promote a 'culture of prevention' on a range of health issues affecting the growing BME population, and 2) Work collaboratively with key local stakeholders (eg, GP surgeries, pharmacists, hospitals, CCGs and community groups) to tackle current health problems and future challenges.
